

DOUBLE TRAP

Last Updated Thursday, 27 February 2014 10:18

Double Trap uses the same shooting range layout as Olympic Trap but shooters shoot at two targets which are simultaneously thrown in the air. Targets will release in couples (the doubles) in front of stand 3. Shooters move through a series of five adjacent shooting stations, shooting at one pair of targets at each shooting station.

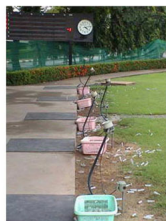

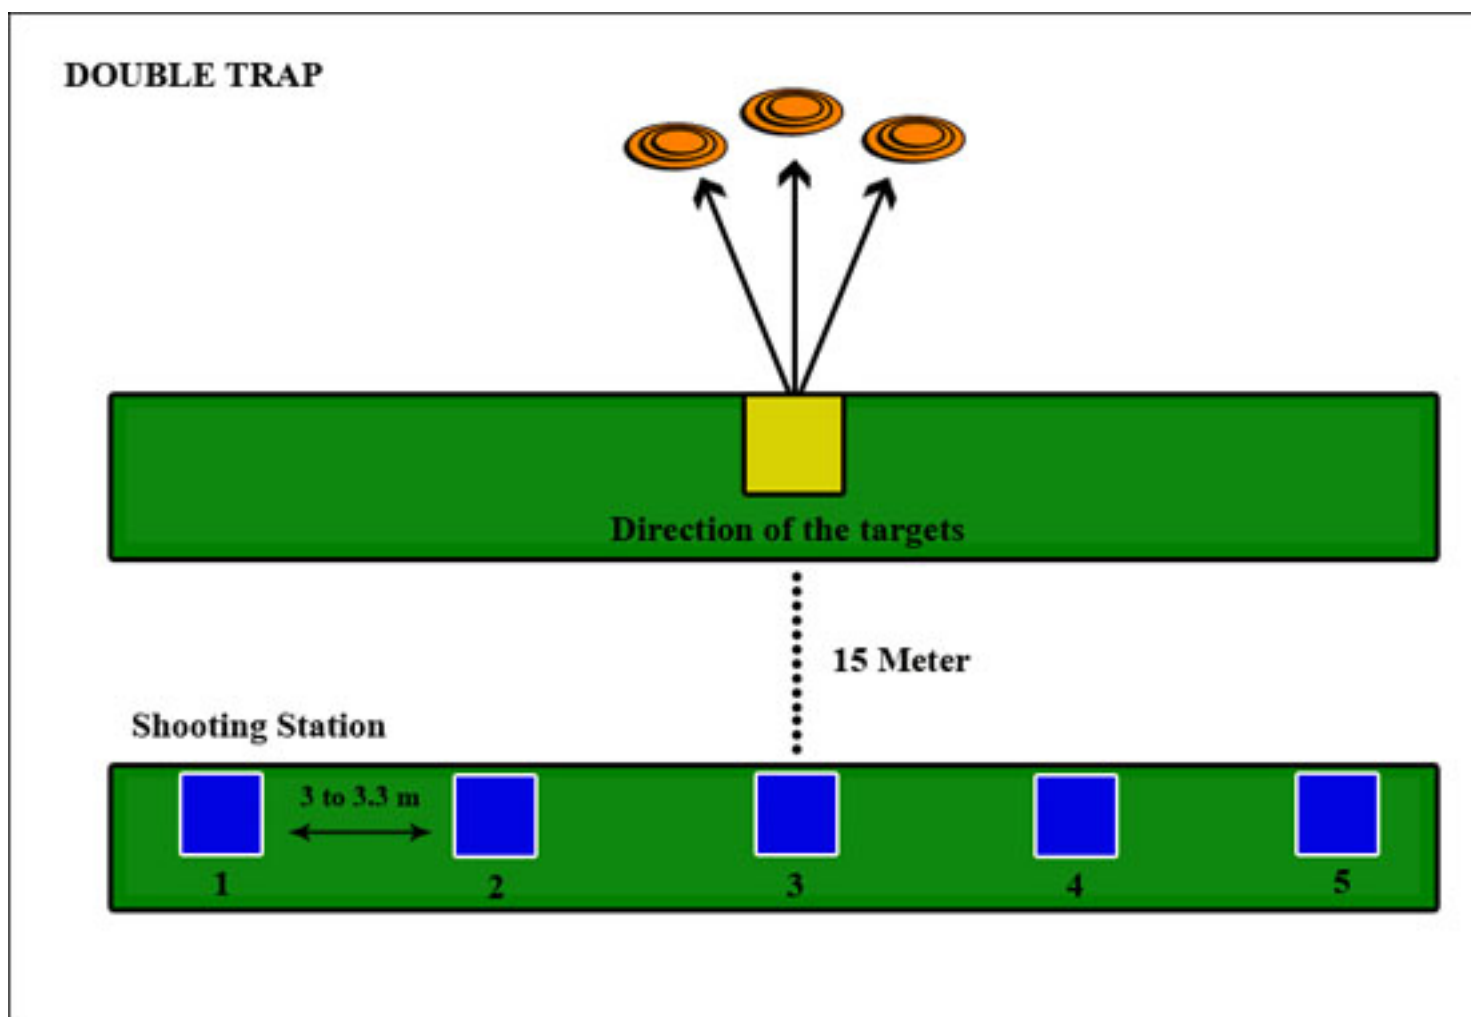

Targets have 3 angles, 0 degree, 5 degree to left and 5 degree to the right. Target sequences of the Olympic Target Shooting disciplines are called scheme or program. Shooters shall run over 3 schemes. Scheme A (25pairs), left and middle, scheme B (25 pairs), middle and right and scheme C (25 pairs) left and middle. Shooters need to shoot all three schemes and the six shooters with the highest qualify scores will enter the final. The final round will be using scheme C.

Men shooters shall shoot 25 pairs or 50 targets and 3 schemes. And the six highest scores shooters shall enter the fianl round. Women shooters shall shoot 20 pairs or 40 targets and 3 schemes without the final round.

DOUBLE TRAP

Last Updated Thursday, 27 February 2014 10:18

Play in the range consists of 50 targets and only 50 shots are taken at each target. Shooting is done by the shooter placing the gun on the trap and pulling the trigger.
